

Bouffe & Amitié

Interac e-Transfer Payment Setup – Instructions for Developer

Hi,

For **Bouffe & Amitié** payments, I would like to start with **Interac e-Transfer**, without Stripe for now.

Here is how I would like the payment process to work:

- 1 The member creates an account and selects their group.
- 2 Before payment, a page displays the **Bouffe & Amitié Terms and Conditions**.
- 3 The member must check “**I have read and agree to the Terms and Conditions**” before continuing.
- 4 The next page displays:
 - Amount to pay: **\$20**
 - Payment method: **Interac e-Transfer**
 - Interac email address: **[to be confirmed]**
- 5 Please generate a **unique reference number** for each member/payment. The member should be instructed to include this reference number in the Interac e-Transfer message so I can identify the payment.
- 6 After sending the Interac transfer, the member clicks “**I have made my payment.**”
- 7 In my admin panel, the member’s payment status should change to “**Payment Pending.**”
- 8 After I verify that the Interac transfer has been received, I should be able to click “**Confirm Payment,**” and the member’s account becomes **active**.
- 9 In the admin panel, I would like to see the member’s name, group, payment date, amount, reference number, and payment status.
- 10 For now, the **\$20 payment is made manually each month**. It is not an automatic recurring payment.

Later, we can automate the payment process further if needed.

Please let me know if you can implement this on the current website and what information you need from me.
